

Take the Chaos Out of Compliance

You've been through the agonizing security/compliance process before, and this year's audit is coming your way, fast. It'll be total compliance chaos as you try to gather supporting documents and keep tabs on your status.

There's got to be a better way of preparing for your audit—some method or tool to make the auditing process easier and simpler. Good news: you're right! There is a better way. With the TCT Portal, you can simplify your auditing process and make it much less painful. Here are five ways TCT Portal takes the chaos out of compliance.

1 Know your status in real time

TCT Portal makes it easy to know the status of every assigned task, at any moment. Our live dashboard is updated in real time, so you see the live state of your whole team.

2 Link your documentation to related requirements

Link similar evidence across your certification, keeping all your document management in sync. Stop spending your time manually tracking the same documents against multiple compliance requirements.

3 Prompt your people automatically

TCT Portal prompts people automatically for you. The system sends reminders every weekday morning to everyone who still owes you an item.

4 One submission method

TCT Portal gives you a single submission method that's easy for everyone. Submit any kind of document into a central location. No more hunting and gathering missing evidence!

5 Store everything in one place

TCT Portal stores everything in one place. Just go to your Dashboard, and all the evidence is right where it needs to be. It's easy to find, and easy to know what you have—and what you still need.

Take the Chaos Out of Compliance

There really is a better way to take control of all of your compliance information. You can master ongoing and annual compliance initiatives with ease. TCT Portal takes the chaos out of compliance. See how easy it can be—schedule your live demo today.
